

The reason I purchased xm radio is due to your sensorship of free radio. Leave the satellite radio alone. I pay to listen to what I want to and have every right to.

I no longer listen to am or fm radio but I still expect to be able to listen to my traffic and weather. Unless you are planning to refund my purchase price for equipment and subscription you have no right to limit or sensor what I listen to in any way.

I dont need you looking out for me.
